Initial Build Notes

16 November 2022

- Overall nice job!
- Timeline tracker on Discography page isn't working
 - If can't build, it would still be useful to have some other icon or mechanism (e.g. arrows) to indicate to the user that they should scroll horizontally to see the albums
 - Same with Members page because right now there's no indication that the user should scroll horizontally
- More photos on the philanthropy page > whatever number of images to make reading the text less taxing since it is a wall of text right now
 - Also the text width should be less
- 'Proof' album image isn't showing up right now on my end 😞
- Home page needs styling
