Project Title: Introducing BTS (the band)

I'd like to create a microsite about the South Korean boy group BTS. They've been one of the biggest bands in the world for the past few years. They have released multiple studio albums and won numerous awards. They have also been impactful in their philanthropic activity, altogether inspiring their massive fanbase across the world. There is a lot of information about them, but I envision this site as a starting point for people who might want to know some basic information about them and their work.

- **Home Page** – This page will introduce the band as a whole + lay out sections that lead to the other pages of the site.
- **Members** – This page will be background information about each of the seven members and their roles in the group as well as some of the work that they have released individually.
- **Studio Albums** – This page will be information about the group's official studio albums that have been released in the past nine years that they have been active.
- **Artistry** – This page will have information about the musical styles and influences in BTS's music as well as major themes in the lyrics throughout their work.
- **Major Awards & Accolades** – This page will discuss some of the major awards and accolades that the group has received.
- **Philanthropy & Activism Work** – This page will be about BTS's philanthropic work (mainly their Love Yourself campaign).
- **Other Projects** – This page will be about other media and projects that BTS have released (mainly their variety show Run! BTS and their reality shows BTS: Bon Voyage and BTS In the Soop).
- **Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
